Conversion—Oil 10 per cent Convertible Cumulative Preference Shares

* Pursuant to the conversion rights attaching to the 10 per cent preference shares, 85 878 12½c oil ordinary shares were issued to the registered holders of 103 095 10 per cent preference shares with effect from 1 October 1976. Shares issued in terms of the aforementioned conversion right will rank for interim dividend purposes.

Earnings per share

Earnings per ordinary share is calculated using 13 685 878 ordinary shares in issue (including 10 per cent preference shareholders ordinary share entitlement) at 31 August 1976 and profit attributable to ordinary shareholders.

General

The customary increase in the pilchard quota from 50 per cent to 60 per cent of total permissible landings, usually granted in June, was not forthcoming. This resulted in a lower production of canned fish and fish meal. Fish body oil yields were poor but prices high. Fish meal exports were curtailed to supply the local market where prices are considerably lower than on international markets. Similarly, the local market was supplied with canned fish at prices lower than the ruling prices on export markets. Production in the international fishing venture was interrupted to permit a major factory conversion which will enable us to produce frozen fish on a large scale. The five month conversion was completed in September and this venture should make a contribution in the second half of the financial year.

Combined property, construction and home building profits are running at a level comparable to last year. Previous structural changes in the property division have ensured a positive cash flow.

In the present uncertain climate, we deem it wise to aim for a dividend cover of approximately 2,5 times. This is consistent with previously stated policy.

For and on behalf of the Board,
J. OVENSTONE
D. MacP. OVENSTONE } *Directors.*
